Connecting Power BI to Snowflake

1. Power BI was opened.

2. The **Home** tab was accessed, and **Get Data** was selected.

3. In the **Get Data** window, **Snowflake** was chosen, and **Connect** was clicked.

4. The connection details for the Snowflake account were entered:

   o **Server**: The Snowflake server was entered.

   o **Warehouse**: The warehouse to use was selected.

   o **Database**: The database was specified.

   o **Schema**: The schema for connection was chosen.

5. Once connected, in the **Navigator** pane, the tables or schemas to load into Power BI were selected.

6. **Load** was clicked to begin importing the data.
